

Physician Leadership Essentials

Our Physician Leadership Essentials Program is a technology-based solution that focuses on improving results in the areas of Leadership Development, Communication and Engagement, Diversity and Inclusion, High-Reliability and Digital Transformation.

We know that making the transition from accomplished clinician to physician leader takes more than strong clinical skills—it requires a fundamental shift in thinking and new tools to affect positive change. To be most effective, physician leaders must be able to understand and influence key decisions that impact every facet of the rapidly changing health care environment. The goal of this program is to prepare physicians to serve as successful leaders that manage these challenges today and into the future.

Benefits of the Program

- Tailored customization to any organization
- Access to more than 100 core leadership topics and facilitated group sessions via our on-demand Activ8 platform that incorporates our Learn, Do, Inspire methodology
- The opportunity to learn from and engage with leadership curriculum and mentor-experts on your own time
- Fun with gamification
- Superior retention/adoption and learner satisfaction by using relevant examples for real-time integration

Testimonial

“We were very excited to participate in the Activ8 Physician Leadership Program. The content on the platform that was most relevant and interesting included provider well-being; the development of leader roles and responsibilities; the focus on quality, safety and regulations; the improvement community; monitoring money as value; and innovation and action. We felt the platform provided flexibility to balance on-line self-study, which was very valuable during the height of COVID-19. It was also nice to have real-time sharing of information. We plan to have more emerging physicians participating in 2021.”
